

CHESTER HILL PUBLIC SCHOOL

Quality education in a caring learning environment

Infectious Diseases

Dear Parents / Carers,

At present we have many students coming to school who are sick. We ask that if your child presents any symptoms such as a high temperature, headaches, tiredness or rashes etc, which may be related to diseases such as slap face, measles, mumps, foot and mouth or chicken pox, that you please seek appropriate medical advice and **notify the school office immediately**.

This is necessary for the following reasons:

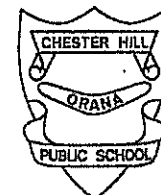

- To stop the spread of these infectious diseases to other students
- To protect those members of our school staff and school community who are pregnant
- To support a seriously ill student whose immunity to disease is very low.

Thank you for your cooperation in this matter.
